

February 2, 2010

Dear Steve and Rich,

I just wanted to drop you a note thanking you for inviting me to hunt with you this December. Working with the Buckmasters organization for many years has given me the opportunity to hunt all over the country and on some of the best properties and outfitters in the country. That being said I have to tell you how impressed I was with that 170 acre property Steve and I hunted. The way it laid out was perfect for holding lots of deer. Being far from local farm fields and in the center of all that timber your food plots, were drawing deer like a magnet. I could not believe the amount of deer and the quality of bucks I saw. I passed on several bucks in the 150 class hoping for a shot at a non typical buck rich had shown a trail cam picture of. I saw a huge buck in the thick timber I couldn't get a shot at that would have been in the high 180 class the first night. My only regret is that we only had two days to hunt and because of that huge blizzard coming our way we had to leave early. Again I want to thank you for two of the best days of hunting I have had in a long time. You mentioned to me that the property was for sale. If I didn't have two kids in college right now I would have bought it from you after the first night on stand. If by chance it is not sold by next hunting season I was talking to Jacky Bushman and he would be interested in filming a T V show there if it is alright with you. After seeing the potential of this land I feel it would only take a few days to put some big buck footage in the can in a few days of hunting. Talk it over and let me know.

Thanks again,

JERRY ZEPATOS
